Shiva Sai

Software Engineer

Hyderabad, Telangana, India | +91 6302872442 | shivasaiyadav0803@gmail.com
github.com/Shivasaiyadav08 | linkedin.com/in/shivasai-yadav

PROFESSIONAL SUMMARY

Software Engineer experienced in full-stack SaaS development, Generative AI, Agentic AI, and Blockchain/Web3 applications. Built enterprise ERP modules, AI-powered research platforms, SaaS management tools, and decentralized applications using React, Next.js, Python/FastAPI, Node.js, LangGraph, RAG, Solidity, and Foundry. Skilled in LLM integration, AI agent orchestration, REST APIs, authentication, and end-to-end software development.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, TypeScript, PHP, Solidity

Full Stack / SaaS: React.js, Next.js, Node.js, Express.js, FastAPI, CodeIgniter, HTML, CSS, Tailwind CSS, REST APIs

AI / Gen AI: LangGraph, LangChain, Prompt Engineering, RAG, Gemini, AI Agent Orchestration, Evaluation, Ollama, OpenAI SDK, Tavily, vector search

Blockchain / Web3: Ethereum, Sepolia, Foundry, Chainlink, wagmi, viem, MetaMask, RainbowKit, EVM

Databases: PostgreSQL, pgvector, Supabase, MongoDB, MySQL, Mongoose, Chroma

Tools / Cloud: Git, GitHub, GitHub Actions, CI/CD Pipelines, Docker, Vercel, Render, Postman, Clerk, Alchemy, Infura

EXPERIENCE

Junior Software Developer Intern | **Karat Infinity** **May 2026 – Sep 2026**

Hyderabad, India | PHP, CodeIgniter, MySQL, React.js, JavaScript, HTML, CSS, Git

- Developed ERP modules for procurement and asset management, including purchase approvals, vendor workflows, asset tracking, and inventory visibility.
- Contributed to frontend, backend, and database functionality to support reliable enterprise workflows and improve application usability.

Software Developer and Community Member | **Obblee**

Freelance software development community

- Developed an AI-powered research application for a PhD researcher, using fixed LangGraph orchestration, RAG, Tavily web search, and AI-based research synthesis.
- Built a responsive business website using Next.js and Tailwind CSS; contributed to CRM application development.
- Coordinated the Obblee development team, organizing contributions across software projects.

PROJECTS

Crebry – Agentic AI Research Platform Live | Code

Next.js, Python, FastAPI, LangGraph, Gemini, Tavily, Supabase, PostgreSQL/pgvector

- Engineered a LangGraph orchestrated Corrective RAG research workflow that retrieves and grades document evidence, conditionally searches the web, and validates generated answers with source citations.
- Implemented document ingestion, authenticated workspaces, streamed research responses, persistent jobs, and Gemini model fallback for resilient AI-assisted research.

Edith – AI-Powered Project and Expense Management Live | Code

React, TypeScript, Node.js, Express.js, MongoDB, Clerk, Gemini, Tailwind CSS

- Developed a full-stack workspace for projects, tasks, budgets, expenses, financial reports, and CSV exports, supported by authenticated REST APIs.
- Integrated Gemini AI for task drafting, receipt/document-based expense extraction, and natural-language questions grounded in authorized workspace data.

Decentralized Stablecoin – Ethereum DeFi dApp Live | Frontend Code | Contract Code

Solidity, Foundry, Sepolia, Next.js, TypeScript, Chainlink, RainbowKit, wagmi, viem

- Adapted an educational collateralized-stablecoin implementation, deployed an instance to Ethereum Sepolia, and built a wallet-connected Next.js dApp.
- Integrated collateral deposits/redemptions, mint/burn and liquidation flows, oracle-based health monitoring, contract simulation, approvals, and transaction tracking.

EDUCATION

J.B. Institute of Engineering & Technology **2023 – 2026**

Bachelor of Technology, Computer Science and Engineering (AI & ML specialization) | CGPA: 8.62/10

Jawaharlal Nehru Technological University | Hyderabad, India

CERTIFICATIONS

NPTEL: Programming in Java; Blockchain

Cyfrin Updraft: Blockchain Basics; Foundry
